

1. Lentiviral Construct Packaging, Titering, and Transduction

The protocols in the Lentiviral Construct Packaging, Titering, and Transduction User Manual can be used with nearly all pre-made and custom lentiviral shRNA, sgRNA/Cas9, sgRNA-only, Cas9-only, cDNA, barcode, and reporter constructs available from Collecta. For specific information on the particular constructs that you have purchased, please review the product information you received by email upon delivery (either by link or attachment):

References and Product Citations for all Collecta products can be found on the Collecta website:

<https://collecta.com/pages/citations-publications>

Please read the entire user manual before proceeding with your experiment. Also, please note that, when working with pseudoviral particles, you should follow the recommended guidelines for working with Biosafety Level 2 (BSL-2) materials.

 Click the ↓ Download as PDF link located at the bottom of the left menu to download the PDF version of this user manual.

PLEASE NOTE: The purchase of all Collecta Products is covered by Collecta's standard Terms and Conditions of Sale as described on [Collecta's website](#), and selected Products containing particular technology or having certain features are also subject to restrictions on use as outlined in the [Label License section](#) of our website. Please review these Terms and Label License Restrictions before opening and using your Product and, if you are not able to abide by the restriction, contact Collecta to return the item to Collecta for a full refund.
