Product Information Sheet # 1025GE

SUMMARY

shipped on blue ice; store at -20 °C

For research use only.

Not for use in diagnostic or therapeutic procedures.

## Description

Polyclonal antisera were raised in rabbits after immunization with the conjugates: NO-Lysine-glutaraldehyde-carriers.

**Contents:** The antibody is supplied in a unit size of 50 µl in PBS with 50% glycerol.

## **Storage and Handling**

When this product is stored undiluted at -20 °C or lower, it is stable for at least 2 years. Multiple freezing and thawing is only possible up to 5 times. The antibodies can be prediluted 10x in PBS containing 0.1% merthiolate or a mixture of PBS/glycerol (1:1, vol./vol.). At 4 °C these solutions are stable for 2 months.

#### Specificity

Using a conjugate NO-Lysine-glutaraldehyde-protein, antibody specificity was determined in an ELISA tes by competition experiments with the following compounds:

Compound	Cross-reactivity ratio <sup>(a)</sup>	
NO-Lysine-G-BSA	1	
Lysine-G-BSA	1:	> 100,000
NO-Arginine-G-BSA	1:	> 100,000
NO-Glutamine-G-BSA	1:	> 100,000
NO-Cysteine-G-BSA	1:	> 100,000

(a): NO-Lysine-G-BSA concentration/unconjugated or conjugated close-related compounds concentration at half displacement;
G = Glutaraldehyde, BSA = Bovine Serum Albumine

#### **Recommended dilution**

The anti-conjugated NO-Lysine antibodies can be diluted 1:2,000 to 1:5,000.
